ABOUT K-AI

AI has become part of daily life — not just for specialists, but for anyone trying to learn, build, or get work done. K-AI exists because finding the right tool for that shouldn't mean digging through a dozen tabs. It's a central hub for AI tools across education, coding, business, writing, and beyond, built by a student who was tired of doing exactly that.

Browse by category

Every tool on K-AI is sorted into one of four categories.

Education and Research

Learn with AI.

Coding and Technology

Write code with AI.

Business and Productivity

Get work done faster.

Writing and Creativity

Write and create with AI.

Tools

Browse different AI tools.

EDUCATION AND RESEARCH

Study

Turns notes into a study guide.

CODING AND TECHNOLOGY

Code Fixer

Checks and debugs your code.

BUSINESS AND PRODUCTIVITY

Plan

Turns to-do lists into daily schedules.

WRITING AND CREATIVITY

Write

Helps you write.

How K-AI works

1

Pick a category

Start from what you're trying to do.

2

Compare tools

See what each tool does best.

3

Launch it

Open the tool and get to work.

ABOUT K-AI

Built by a student who kept losing track of AI tools

K-AI started as a personal project by Kevin Beni, a college student who noticed how much AI was changing daily life — and how scattered the tools for it were. What began as a way to organize a growing list of favorites turned into a central hub for education, coding, business, and creative tools alike, built for students first.

Kevin Beni

Creator of K-AI

Why K-AI

One place to look

Every category lives on K-AI, so you stop bouncing between tabs.

Picked, not scraped

Each tool is added and checked by hand, not pulled from a random list.

Built for students

Made by a student, for the tools students actually reach for.

Popular this week

EDUCATION AND RESEARCH

Study

Turns notes into a study guide.

CODING AND TECHNOLOGY

Code Fixer

Checks your code.

BUSINESS AND PRODUCTIVITY

Task

Turns meetings into tasks.

WRITING AND CREATIVITY

Write

Helps you write.

What each type of tool actually does

Image Generation

Creates original images and art from a text prompt.

Video

Edits, generates, or captions video content.

Politics

Summarizes legislation and tracks public records.

Research

Finds and summarizes academic sources.

Finance

Tracks spending and explains financial terms.

Health

Answers general wellness and fitness questions.

Sports

Analyzes stats and predicts outcomes.

Law

Reviews contracts and explains legal terms.

Creativity

Brainstorms ideas and creative concepts.

Productivity

Automates repetitive daily tasks.

Technical and Data

Cleans, analyzes, and visualizes data.

How the directory works

01

Added by hand

Every tool is reviewed and added .

02

Sorted by purpose

Tools are grouped by what you're trying to do, not by buzzwords.

03

Checked regularly

Listings are revisited so broken or outdated tools don't stick around.

AI DIRECTORY

Education and Research

Learn with AI.

Whether you're studying for an exam or starting a research paper, these tools can save you hours.

Study

Turns notes into a study guide.

[View profile](#)

Practice

Makes quizzes for you.

Compass

Finds sources for your research.

Recall

Turns readings into flashcards.

Output

- ✓ Summarizing textbook chapters
- ✓ Building a study schedule before finals
- ✓ Turning a research question into an outline
- ✓ Generating practice questions from your own notes

Common use cases

Exam prep

Turn weeks of notes into a focused study guide the night before a test.

Research papers

Find and summarize sources instead of reading twenty abstracts.

Language learning

Practice conversations and get instant grammar feedback.

Tips for getting the most out of these tools

- Upload your syllabus or notes first – tools work best with real material.
- Use flashcard tools a few days before an exam, not the night before.
- Cross-check AI-generated answers against your textbook.

AI DIRECTORY

Coding and Technology

Write code with AI.

From your first bug to your next deploy, these tools help you write and ship code faster.

Code Fixer

Checks your code.

[View profile](#)

Debugger

Finds bugs in your code.

Patch

Fixes failing tests for you.

Sentry

Reviews pull requests for you.

Output

- ✓ Reviewing a pull request before it ships
- ✓ Explaining an error message in plain English
- ✓ Writing unit tests for existing code
- ✓ Refactoring a function without breaking it

Common use cases

Debugging

Paste an error and get a plain-language explanation of what broke.

Code review

Catch style and logic issues before a human reviewer sees them.

Learning to code

Get a line-by-line explanation of unfamiliar code.

Tips for getting the most out of these tools

- Review every suggested fix before committing — don't auto-accept blindly.
- Point code tools at one file or function at a time for better results.
- Use a linter alongside AI review, not instead of it.

AI DIRECTORY

Business and Productivity

Get work done faster.

Meetings, reports, and planning take less time when an AI tool handles the first draft.

Task

Creates and organizes daily tasks.

Report

Writes reports for you.

Relay

Drafts replies to your emails.

Grid

Builds a project plan for you.

Output

- ✓ Turning a meeting recording into action items
- ✓ Drafting a status update for your team
- ✓ Building a project timeline from a brief
- ✓ Automating a repetitive weekly report

Common use cases

Meeting recaps

Turn a recorded call into notes and action items automatically.

Email drafts

Get a first draft of a reply so you're not starting from blank.

Scheduling

Turn a rough task list into a realistic daily plan.

Tips for getting the most out of these tools

- Record meetings with consent before using a summarizer tool.
- Review AI-drafted reports before sending them out.
- Set recurring reminders so planning tools stay up to date.

AI DIRECTORY

Writing and Creativity

Write and create with AI.

From a blank page to a finished draft, these tools help you write, edit, and create.

Write

Helps you write.

Creation

Generates images and videos for you.

Echo

Rewrites your draft in a new tone.

Frame

Storyboards a video from a script.

Output

- ✓ Getting past writer's block on a first draft
- ✓ Generating on-brand images for a project
- ✓ Rewriting a paragraph in a different tone
- ✓ Turning a script into a storyboard

Common use cases

First drafts

Get past the blank page with a starting draft to edit.

Image concepts

Generate visuals for a project without hiring a designer.

Editing feedback

Get suggestions on tone, clarity, and pacing.

Tips for getting the most out of these tools

- Use AI drafts as a starting point, then edit in your own voice.
- Always disclose AI-generated images per your platform's rules.
- Save a few prompt templates that consistently work for you.

Study

CATEGORY	PRICE	PLATFORM
Education	Free to try	Web

Visit Study

Study turns your lecture notes and readings into a clear study guide in minutes, so you spend your time reviewing instead of organizing.

Try Study

Upload your notes, slides, or readings, or describe what you're studying for...

Generate

Attach notes, documents, or photos — PDF, DOCX, PNG, JPG up to 25MB.

What it does

Study guides

Turns notes and slides into an organized guide.

Key terms

Pulls out the terms most likely to matter.

Practice questions

Generates questions to test what you know.

Similar tools

Practice

Makes quizzes for you.

Compass

Finds sources for your research.

Recall

Turns readings into flashcards.

Code Fixer

CATEGORY PRICE PLATFORM
Coding Free to try Web, IDE

Visit Code Fixer

Code Fixer reviews your code as you write it, explains what it finds in plain language, and suggests a fix you can accept in one click.

Try Code Fixer

Paste your code, or upload a file to review...

Generate

Attach notes, documents, or photos — PDF, DOCX, PNG, JPG up to 25MB.

What it does

Code review

Flags issues before you open a pull request.

Plain explanations

Explains why something is a problem.

One-click fixes

Applies the suggested fix instantly.

Similar tools

Debugger

Finds bugs in your code.

Patch

Fixes failing tests for you.

Sentry

Reviews pull requests for you.

What makes a good AI tool

1

Does one thing well

The best tools solve a specific problem instead of trying to do everything.

2

Clear about limits

A good tool tells you what it can't do, not just what it can.

3

Easy to leave

You should be able to export your work and walk away anytime.

4

Actually maintained

Still updated, still online — not an abandoned side project.

Frequently asked questions

Is K·AI free to use?

Yes. Browsing the directory and reading tool profiles is free.

How do you pick which tools to list?

Every tool is added and checked by hand, not pulled from an automated list.

Can I suggest a tool?

Yes. Use the contact link in the footer to send a suggestion.

Do I need an account to browse?

No. You can browse the whole directory without signing up.

About K·AI

Why one student decided to build a home for every AI tool.

Kevin Beni

Creator of K·AI

Computer Information Systems student,
University of South Carolina.

The story behind K·AI

As a college student, I've seen firsthand how much AI has changed daily life — not just for me, but for everyone around me. It's gone from a novelty to something people rely on every day, for work, school, and everything in between.

That's why I built K·AI, named after myself. Instead of AI tools being scattered across a hundred different sites, K·AI brings them together in one place — organized by what they're actually good for, from education and research to coding, business, and creative work.

My goal is simple: make K·AI a central AI hub where anyone can explore the different types of AI tools out there and find the ones that fit what they need.

“My main goal for K·AI is to be a central AI hub for users to explore all different types of artificial intelligence and tools for their needs.”

— Kevin Beni, Creator of K·AI
